

Create a Drilldown Map in 7 Steps

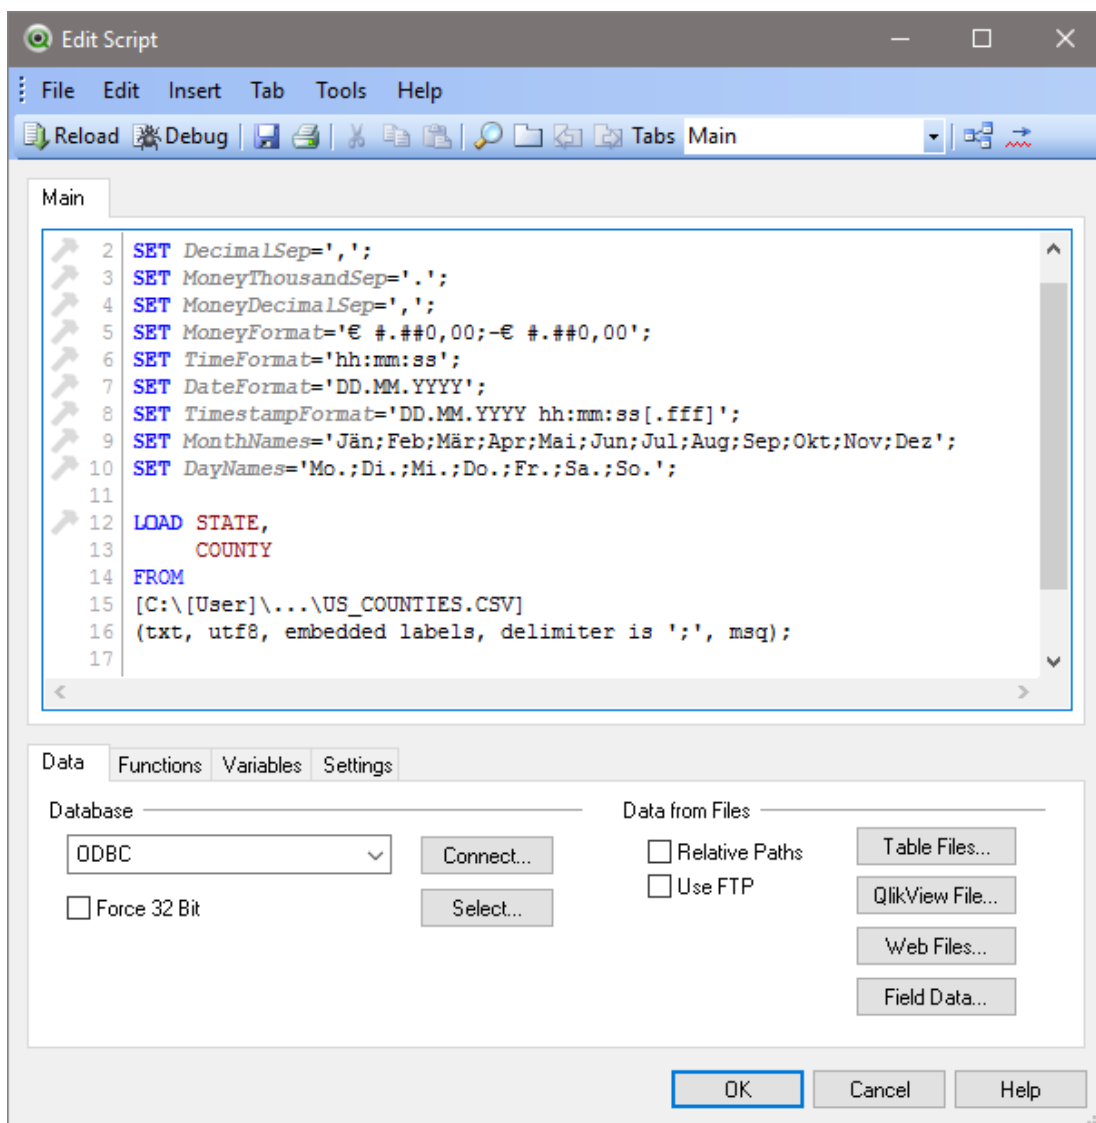

Requirements:

- QlikView Desktop installed (<http://www.qlik.com/us/try-or-buy/download-qlik-sense>)
- NPGeoMap for QlikView installed (</index.php/en/demoversion-en>)

Step 1

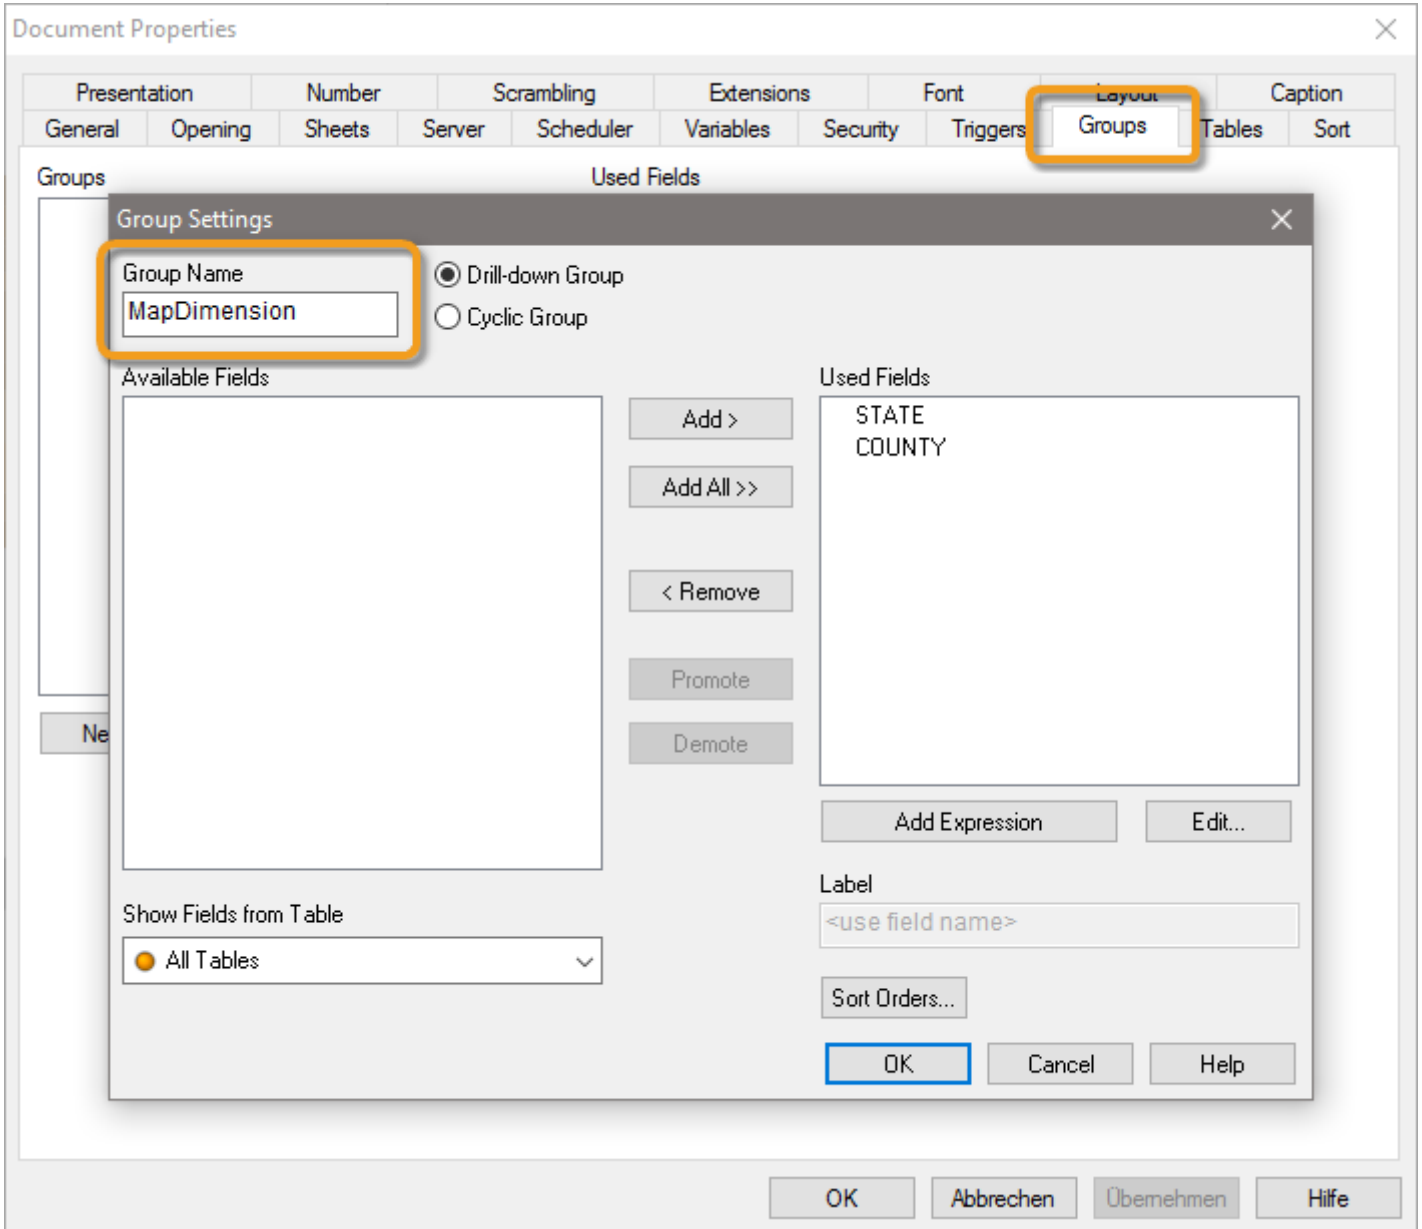

Create a new QlikView App and load the file USCounties.CSV (</index.php/de/component/downloads/send/9-tutorials/53-tutorial-drilldown-data-for-us-countys-us-counties-csv>)

(</index.php/downloads-free/send/3-npgeomap-public/45-getting-started-datatable-xlsx>)

Step 2

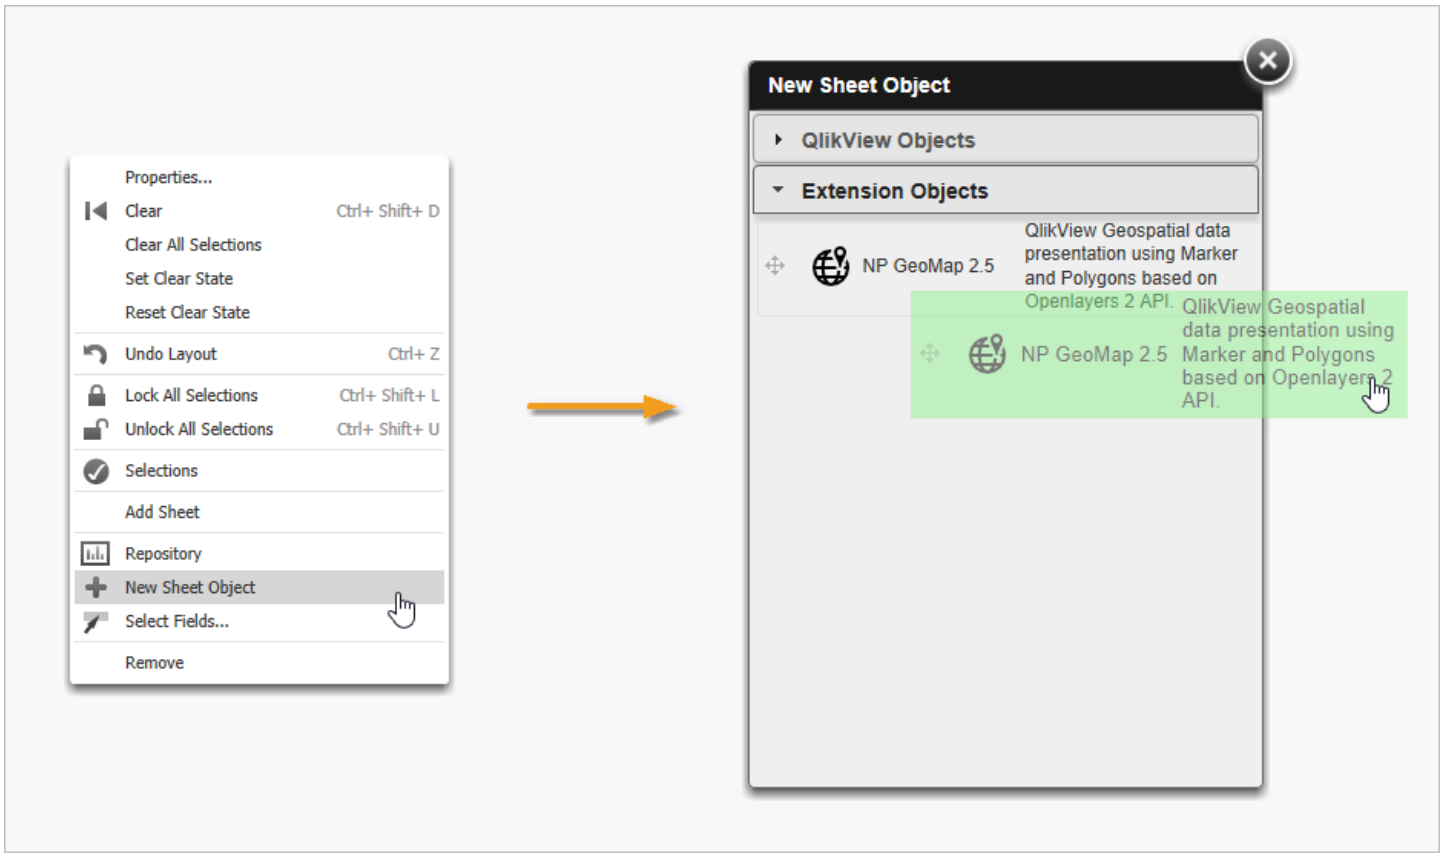

Create a new QlikView Group type "Drill-down" in "Settings" » "Document properties" and name it "MapDimension". Pay attention to the order of the Fields, going from low resolution (States) to high resolution (Counties).

Step 3

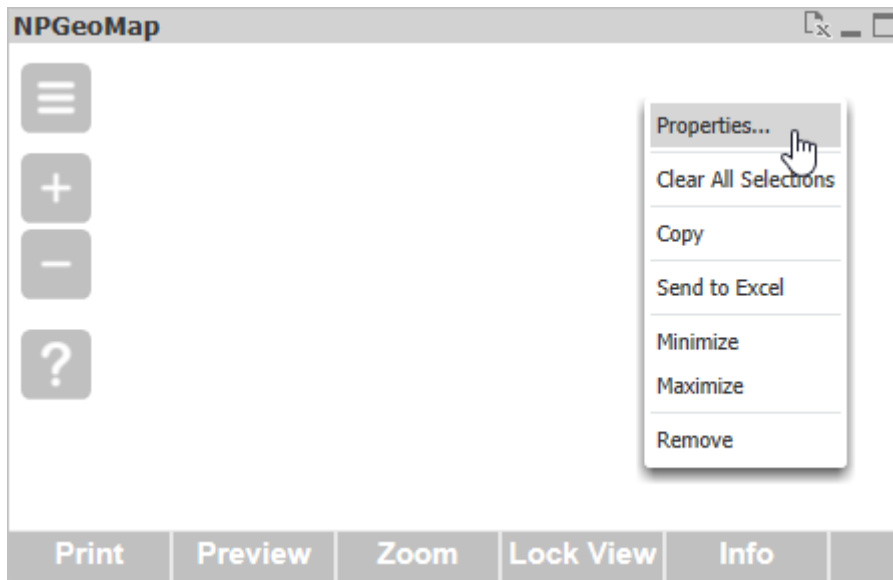

Go to "View" in QlikView and "Turn on WebView".

Right click on the sheet » "New Sheet Object" » "Extension Objects" and drag NPGeoMap on your worksheet:

Step 4

Right click on the NPGeoMap Object and go to "Properties..."

Step 5

We want to display a multilevel map going from US States to Counties.

Therefore set the new QlikView Group Dimension "MapDimension" as a Polygon Dimension in "Basic Settings".

Basic Settings		
Help Downloads NPGeoMap		
Map Settings		
Maptype	Don't show world map	<input type="checkbox"/> <i>fx</i>
Options	="// EXTENDED MAP SETTINGS <i>fx</i>	
Dynamic Objects		
	Dimension / Unique ID	
Polygon	MapDimension	<input type="checkbox"/> <i>fx</i>
Marker	\$Info	<input type="checkbox"/> <i>fx</i>
Zoom Settings		
Zoom Areas	// ADD A QUICK ZOOM MENU <i>fx</i>	
Zoom Layer	Automatic	<input type="checkbox"/> <i>fx</i>
Zoom Level	// ZOOM LEVEL DEFINITION <i>fx</i>	
Global Settings		
Marker Units	Pixel	<input type="checkbox"/> <i>fx</i>
Expert	// EXTENDED SETTINGS <i>fx</i>	
Classes	// COLOR & SIZE CLASSES <i>fx</i>	

Step 6

Now go to "Dynamic Map Layer" and open the fx-Expression-Editor "Source" to enable loading the supplied map files. Since we want to display different maps, depending on the drilldown level and the selection respectively, we need to set a condition here:

```
=if(GetPossibleCount(STATE) = 1, 'US_2.NPGP', 'US_1.NPGP')
```

Copy the formula and paste it inside the expression.

Explanation: If only one State is selected, the map "US_2.NPGP" showing the counties is loaded. Else "US_1.NPGP" showing the states will be loaded.

Dynamic Map Layer

Polygon Coordinates

Source	=	<i>fx</i>	Resolution	'100'	<i>fx</i>
--------	---	-----------	------------	-------	-----------

Polygon Presentation

	Expression	
Dynamic	=// DYNAMIC MAP SETTINGS	<i>fx</i>
Simple	=// SIMPLE MAP SETTINGS	<i>fx</i>

Polygon Label Settings

Font	Size	Color	Bold	X	Y
Arial	12	█	<input type="checkbox"/>	0	18

Polygon Image Settings

Height	Width	X	Y
Settings	40	40	-20 -35

```

Edit Expression
File Edit Settings Help
Expression OK
1 =if(GetPossibleCount(STATE) = 1, 'US_2.NPGP', 'US_1.NPGP')
2
3
4 /*
5 //YOU CAN USE THE COORDINATES TAG INSIDE THE POLYGON EXPRESSION TO PLACE MAP COORDINATES OR
6 //ENTER MAP FILENAME BETWEEN THE SINGLE QUOTATION MARKS LIKE:'US_0.NPGP'
7
8 */
9 //NPGeoMap comes with a basic set of 12 maps - more then 400 maps can be downloaded at: http://www.
