# How to get a HERE AppID and AppCode
## to use it in

# NPGeoMap

To use the **background map** from the tile provider "HERE" and the **Isochrone feature** in *NPGeoMap* (provided from HERE as well), you need to get an AppID and an AppCode from their website. This is a short description how that works.

Basically you just have to register on their website, choose a so-called "Plan" (kind of product/agreement) and follow the instructions.

**1. Website**
Open the website
**developer.here.com**

**2. Register**
If you already have an account **Sign in** (upper right corner) or register first and create a HERE account.

**3. Plans**
Click on **Plans** in the top menu to start creating an AppID and an AppCode.

**4. Sign up**

Now you have to choose a so-called "API Plan" - a product/agreement that fits best for your needs and click on **Sign up**.

If you're not sure yet, try the currently **free Basic Plan\*** - perhaps it's already all you need.

*commercial license for consumer–facing apps, limited to 100,000 transactions per month and basic feature set

Consumer Mapping | Enterprise Mapping | Geocoder | Mobile Asset Management

Choose a Consumer Mapping plan to add mapping and location services to your consumer-facing app. Each plan allows you to use its features for a single app or website. To use HERE platform for more than one app or website, simply register for an additional plan for each additional app or website.

Isoline Routing *

**5. Follow the steps**

Complete the forms and fill in all required fields, click on **Continue** - **Agree** - **Place order** and you will finally receive your AppID and your AppCode.

**1. App or website details**

Details of the app or website you will create with this plan

App name (e.g. 'Traffic News App')

App description (e.g. 'Awesome traffic new infographic elements directly in map views

Start Coding!

Congratulations, you've successfully signed up for a plan. API access keys for this application are provided below. You will need to include this app_id and app_code combination in each API request that your application makes. These tokens are accessible at all times from your dashboard. For more information on app_id and app_codes see FAQs. Happy Coding!

**App_Id**

bC6GiomGZb

**App_Code**

xM9xIEhifKr4gz

**Check created IDs**
If you want to have a look at your created IDs, open your profile in the upper right corner and go to **Applications**.
